

Engels on "Abolition" of the State

The State is not "abolished".

It dies out.

This gives the measure of the value of the phrase:

"A free State", both as to its justifiable use at times by agitators, and as to its ultimate scientific inefficiency;

And also of the demands of the so-called anarchists for the abolition of the State out of hand.

**Friedrich Engels,
"Socialism: Utopian
and Scientific"**
