

The International Day of Human Space Flight

TO BE THE FIRST TO DO
WHAT GENERATIONS OF PEOPLE HAD DREAMED OF,
TO BE THE FIRST TO PAVE THE WAY INTO SPACE
FOR MANKIND ...
IF I DECIDE TO MAKE THIS FLIGHT,
IT IS **ONLY** BECAUSE

I AM A COMMUNIST

— YURI GAGARIN,
THE FIRST COSMONAUT OF THE PLANET
HERO OF THE SOVIET UNION

**APRIL 12
THE INTERNATIONAL
DAY OF HUMAN
SPACE FLIGHT**

Politsturm congratulates readers on the International Day of Human Space Flight and reminds that the true space exploration is impossible without eliminating the capitalist system, based on the exploitation and injustice, which drives the whole world into endless crises, wars and hardships, as well as uncontrollably consumes all the resources of the planet.

Only a society of free workers, a society without private property and exploiters, a society based on the principles of justice, humanism and the desire for progress, can bring humanity to a new stage in the space era.
